Frank Rollason, City Manager
1666 Kennedy Causeway, Suite 300
North Bay Village, FL 33141

Dear Mr. Rollason:

The Miami-Dade Water and Sewer Department (WASD) will temporarily change its method of chlorination at each of its regional water treatment facilities. Specifically, free chlorine treatment will be used to provide a somewhat stronger disinfection and bleaching process than the combined chlorine treatment which is normally used at our regional water plants. This change in treatment will occur beginning November 3 , 2014 and will continue through November 16 , 2014. During this period, a consumer may experience unusual chlorine taste or odor in the tap water. However, these temporary conditions will not cause adverse health effects. This periodic change in chlorine treatment has taken place annually and will ensure adequate disinfection levels in the water.

We have enclosed a chlorination fact sheet for your reference.

We sincerely regret any inconvenience our customers may experience during this period, keeping in mind that this task is part of our ongoing effort to provide a safe, potable water supply for the citizens of Miami-Dade County.

If you have any questions concerning this temporary change in treatment process, please call our office at (786)552-4713.

Sincerely,

James E. Turner, Chief
Water Production and Maintenance Division
